Replacement instructions for wand tilt mechanism

1. Remove your blind from the window.
2. Remove the end caps that might be on the ends of the headrail.
3. Slide the metal rod that goes through the tilter away from the mechanism. **DO NOT TAKE IT ALL THE WAY OUT.**
4. Remove the old tilter by gently spreading the headrail apart and snapping the broken tilter out.
5. Insert the new tilter inside the headrail and snap it in place as shown in the picture.
6. Slide the tilt rod back inside the new tilt mechanism, making sure to align the shaft with the hole in the tilter.
7. Reattach the ends caps.
8. Attach the tilt wand.
9. Re-hang the blind.
